

ASSCORPS

CORPORATIONS IN
ANTARCTIC STOCK SIMULATION

ASS

Antarctic Stock Simulation lists itself

Everyone who wants to buy stocks in ASS corps needs to have at least one share of ASS itself

Funds us to operate the simulation, maintain the terminal (game)

NASHA

A club of experiences

Nasha is a genre of adult clubs. Each nasha event is designed for experiences. Nasha clubs have free-flowing alcohol and drugs.

Experiences include raves, concerts, planetarium exhibits, VR gaming, zero gravity parties, gambling dens, orgies, moonparty...

Investment in Nasha is a ticket to some adult parties

ASBL

Automated Synthetic Biology Lab

A lab with lab automation tools designed to implement research protocols in code

Tools are connected using a central nervous system-like architecture with a knowledge base

Simply put, PhD level scientist bot for biotech. Automated discoveries

INDNOVATE

Future of energy

Oel (emissions free oil), microbial fuel cells (energy from biology), starcells (fission/fusion in small spatial units), decentralized free energy, biobattery, direct electron chain reaction, transmutation are some projects

CYBORGINC.

Based on a new verb cyborg-ing, this corp helps humans become cyborgs.

Biotechnology like earpods, artificial immune system, biotattoos, awesome bodymorphism, immortality to modify the human body.

Our approach is to modify human bodies using biocompatible materials and approaches (gene therapy, stem cells)

WETWOOD HOUSINC

Housinc is the practice of owning a house after 30 years of payments

Wetwood Housinc bioengineers seeds to grow houses

Taking prebuilt houses to the extreme because of the rocket weight problem, bioengineered seeds take sunlight and other raw material as input and grow into finished houses.

Plumbing and electrical wiring are like the circulatory and nervous systems

LUCIDNA

Powered by 4th gen DNA sequencing (polymerase + luciferase nanopore), Lucidna is doing a DNA based census of humanity

Future of identity replacing visas, passports, and social security numbers

Many platforms will exist that don't need users' true identities, but the ones that do can use Lucidna's database as a service

CNS ROBOTS

Builds robots with a central nervous system, using information mechanics (IM).

New generation of botmaking. Layered software architecture was designed to split development among humans.

IM makes building robots akin to behavior learning like in living organisms. Allows for rapid automated development.

NIGHT INC.

Sells CNS robots to shops so they can operate after hours

Designed to replicate every job of human labor so Dunkin' Donuts, restaurants, malls, showrooms can operate at night without human labor.

Since the night has fewer customers, it is a good testing bed to automate human labor.

Goal of building Night City

GINC

pronounced ginck or jinck ?

Godel's Incompleteness Inc.

Owns IP 'bots that make bots'

Explores weird things

the Matrix

Simulation of the dead

MAN ON THE MOON

Get people to the moon cheaply

Builds space station hotels, moon bases, initiates interplanetary trade, brings civilization on the moon

Extensively powered by Wetwood Housinc, CNS robots, ASBL. Brings Nasha to the moon.

RICK REALITY (RR)

For the experience of being Rick from Rick & Morty

An entertainment company at its heart, RR strives to give the qualia of hivemind, bird-like flight, cheap spaceships and more using tech.
